DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d) (shown in ADS), which papers have been placed of record in the file.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 30, lines 1-2, "any of claims 22-29" has been deleted.

Amendments to claim 30 were made to define over the applied prior art. This system is deemed to be non-obvious over the systems of the prior art.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 13, 22 and 31:

The primary reason for the allowance of claim 1 is the inclusion of the method steps of: a logger for registering use of said at least one restricted condition monitoring function (F1, F2, Fn); wherein the apparatus is arranged to change the state of a restricted condition monitoring function from the enabled state to the disabled state when said registered use indicates that the limited amount of use has been spent. It is this feature found in the claim, as it is claimed in the

Art Unit: 2863

combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claim 13 is the inclusion of: a logger for registering use of at least one of said condition monitoring functions. It is this feature found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claims 22 and 31 is the inclusion of: a logger for registering use of at least one of said condition monitoring functions (F1, F2, Fn) said registration of use affecting a parameter indicative of an allowed amount of use of said at least one of said condition monitoring functions. It is this feature found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-12 are allowed due to their dependency on claim 1.

Claims 14-21 are allowed due to their dependency on claim 13.

Claims 22-30 are allowed due to their dependency on claim 22.

Claims 32-38 are allowed due to their dependency on claim 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

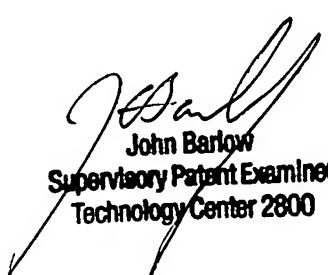

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Antonini (USPN 5,636,281) teaches a method and device to authorize access to an instrument comprising a computerized operating system, Aronsson (USPUB 2001/0001136) teaches a condition analyzer, and Hayes et al. (USPN 6,260,004) teaches a method and apparatus for diagnosing a pump system.
